

PRE-OPERATIVE EVALUATION CAT

Date: _____ Owner: _____ Pet: _____
 Pet ID#: _____ Evaluator: _____ Assistant: _____

CLINIC "TO DO" LIST

Surgery: (spay in heat pregnant high risk) (neuter crypt bicrypt high risk)		ID: ID Collar photo chipped need-mark below	
Deworming: done need-mark Sx sheet	Blue Tag: no yes	Yellow Tag: no yes	Red Tag Reason:
Client Requests:		Rabies Tag: # _____ vet	City Tag: # _____ n/a
Done During PreA Exam: (Rabies 1yr 3yr) (FRCP#1 FRCP#2 FRCP 1yr) (FeLV#1 FeLV1yr) (FeLV Test fecal) (microchip)		To Do While Anesthetized: (Rabies 1yr 3yr) (FRCP#1 FRCP#2 FRCP 1yr) (FeLV#1 FeLV1yr) (FeLV Test fecal) (microchip tattoo L ear tip) (ear swab skin scraping) (IV fluids SC fluids) (additional surgery _____)	
Comments:		Vet Exam: OK for surgery	

TEST RESULTS

CBC Panel Lytes results attached	FeLV Test: Pos Neg	Fecal Direct: Neg Positive: _____
Skin Scraping: Demodex Scabies Negative		Fecal Flotation: Neg Hooks Rounds Coccidia
(Ear Swab Oil: Neg Mites) (Ear Cytology: Neg Yeast Bacteria)		Tapes Other: _____

DESCRIPTION

Asilomar Status (Shelter Animals): healthy treatable-rehabilitable treatable-manageable unhealthy-untreatable unclassified n/a	
Breeds: Breed 1 _____ Breed 2 _____	Patterns: (abby bellyblaze bicolor calico chestblaze clockface dilute marble R-mitten L-mitten point shaded R-sock L-sock solid spotted tabby tabico tabby-on-white torbi torti tuxedo)
Color: Color 1 _____ Color 2 _____ Color 3 _____	
Bite Status: has not bitten has bitten unknown	Health Status: Healthy Minor Issues Moderate Issues Severe Issues
Coat: (short medium long) (smooth curly wiry) (thick thin hairless clipped)	Head: (oriental square DSH round)
Ears: (cropped notched R L tipped R L scarred R L missing R L) (erect semi-erect folded droopy long curled)	
Eye Color:	Tail: none docked short docked medium bobbed long corkscrew kinked long curled
Declawed: front rear both	Collar: color _____ (cloth nylon plastic leather metal)

EXAMINATION In Computer

Distinguishing Marks:	Belongings:
Check for Identification	Tattoo: _____ Microchip Scan: none Number _____ Same as in record Date: _____
Temperature	°F _____ °F _____ <i>normal – 100-102°F, flag >103°F</i>
Heart Rate	beats per minute _____ muffled _____ <i>Normals: cat 100-240</i>
Respiratory Rate	breaths per minute _____ trembling _____ purring _____ <i>normal <40 per minute</i>
Weight	Pounds _____ Flag BCS <3 or >7
Body Condition Score	1 2 3 4 5 6 7 8 9 1 – emaciated – ribs, spine, pelvis and bony prominences evident from a distance, no fat, loss of muscle.

	<p>2- very thin – ribs, spine, pelvis easily visible, no palpable fat, minor loss of muscle mass.</p> <p>3 – thin – ribs easily palpated and sometimes visible, spine visible, no fat over the ribs, pelvis becoming prominent, obvious waist and abdominal tuck</p> <p>4 – underweight – ribs easily palpated with minimal fat covering, waist visible from above, evident abdominal tuck.</p> <p>5 – ideal – ribs palpable but not seen, waist seen from above, abdominal tuck seen from the side</p> <p>6 – overweight – ribs palpable through excess fat covering, waist not prominent from above, abdominal tuck seen from the side</p> <p>7 – heavy – ribs difficult to palpate, fat deposits at lumbar and base of tail, waist absent or barely visible, abdominal tuck may be absent</p> <p>8 – obese – ribs palpable only with very firm pressure, heavy fat deposits at lumbar and base of tail, no waist or abdominal tuck, may be pot bellied</p> <p>9 – grossly obese – Lg. fat layer over back neck limbs, no waist/abd. tuck, pot bellied.</p>
--	---

Age Estimate	Juvenile: _____ weeks months	adult: young mature geriatric (flag)
	2-4 weeks - Deciduous incisors coming in	4-5 months - Permanent canines, premolars and molars coming in
	3-4 weeks - Deciduous canines coming in	5-7 months - All permanent teeth in
	4-6 weeks - Deciduous premolars coming in lower jaw	1 year - Teeth white and clean
	8 weeks - All deciduous teeth are in	1-2 years - Tartar buildup and tooth wear begins
	3 1/2 - 4 months - Permanent incisors coming in	Recessed gums often means geriatric
General Appearance	Playful BAR QAR Lethargic Care: Excellent Good Adequate Poor Neglected	Comments:
Temperament	Friendly Timid Frightened Feral Aggressive-May Bite Aggressive-Complete Danger Cat Aggressive Dog Aggressive Cage Aggressive Food Aggressive	Comments:
Hydration	Normal Dehydrated: _____ % Flag if dehydrated	4-6% dehydrated: dry gums 6-8% dehydrated: loss of skin moisture, increased PCV/TS 8-10% dehydrated: sunken eyes 10-12% dehydrated: persistent skin tenting, dull eyes >12% dehydrated: weak pulses, lethargic
Muskuloskeletal	Lameness: RF LF RR LR none Comments:	Grade 1: lameness barely noticeable Grade 2: weight bearing, noticeable lameness Grade 3: sometimes carries the leg Grade 4: often carries the leg Grade 5: always carries the leg, non-weightbearing lameness
Skin	Fleas Ticks Normal Hair Loss Itching Skin Masses Sores Matted Fur	Skin Scraping Taken Capstar Blue Comments:
